sdmay23-41: Automated Testing Station for Sensing Applications

Week 3 Report October 10 - October 14

Team Members

Thomas — Group Organizer / Software Developer Malvin Lim — PCB Research
Garth Anderson — PCB Research & Design
Matthew Rief — CAD diagrams & Research

Summary of Progress this Report

Complete another design document component - Researched a potential servo that would work for the project.

Pending Issues

Research and plan PCB designs. Finalize servo decision.

Plans for Upcoming Reporting Period

Review sample LabView programs, Update CAD diagrams.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Thomas	Contributed to design document and updated group website	6	
Malvin Lim	Contributed to Design Document & servo research	4	0
Garth Anderson	Contributed to Design Document & servo research	4	0
Matthew Rief	Contributed to design document and research a possible servo that could work	5	0

Gitlab Activity Summary Nothing to report.
