## sdmay23-41: Automated Testing Station for Sensing Applications

Week 7 Report

November 7 - November 11

#### **Team Members**

Thomas McCoy — Team Organizer / Software developer
Malvin Lim — Gas Regulation PCB
Garth Anderson — LED PCB Design
Matthew Rief — CAD designs

#### **Summary of Progress this Report**

Continued work on PCB development and work on design documents

#### **Pending Issues**

PCB development

## **Plans for Upcoming Reporting Period**

Design Document work & PCB Development

#### **Individual Contributions**

Team Member	Contribution	Weekly Hours	Total Hours
Thomas McCoy	Updated team website and organized design document	3	0
Malvin Lim	Circuit and PCB Designing for Mass Flow Controller	5	
Garth Anderson	Weekly assignments, KiCad schematics and PCB, BOM	3	0
Matthew Rief	Updated CAD designs and worked on design documents	3	0

# **Gitlab Activity Summary** Nothing to report.
