## sdmay23-41: Automated Testing Station for Sensing Applications

Week 8 Report

November 14 - November 18

#### **Team Members**

Thomas McCoy — Team Organizer / Software devleoper Garth Anderson — LED PCB designs

Malvin Lim — Gas Regulation PCB

Matthew Rief — CAD designs

## **Summary of Progress this Report**

Design Document work & PCB development

## **Pending Issues**

PCB development, Responsibility and ethics

## **Plans for Upcoming Reporting Period**

PCB development & Design Document work

#### **Individual Contributions**

Team Member	Contribution	Weekly Hours	Total Hours
Thomas McCoy	Updated Team website, and organized/worked on design documents	3	0
Garth Anderson	Weekly assignments, KiCad schematics and PCB, BOM	3	0
Malvin Lim	Circuit and PCB Designing for Mass Flow Controller	5	
Matthew Rief	Worked on design documents and update CAD designs	3	0

# **Gitlab Activity Summary** Nothing to report.
